lot, there is still some way to go. apply the optimal value disciplines IT slowed down but was definitely between the five functional areas not derailed by these events and of IT by moving from a low val-

ue support focus towards a higher maturity level in terms of business value for Research, Teaching and Learning, while sustaining the maturity of administrative systems and shared services. Regarding the latter, IT will be a core contributor to the successful implementation of the new Teaching and Learning strategy.

## **CONTENTS**

04 RISK MANAGEMENT 08 TOTAL INCIDENTS

ITIanwu - REPORT

ITarwu - RISKS

04

Risk management is the process of recognising, evaluating and managing threats. These risks may originate from various sources like for instance global scale financial and environmental demands which are driving us to achieve more with less. Diminishing IT security threats, data-related risks, and the risk management strategies, become a top priority for IT@NWU. Taking the latter into consideration, our risk management plan strife to recognise and control threats to our assets, including proprietary corporate data, a customer's personally identifiable information and intellectual property.

#### Project: Information Technology Risks

IT275 - Lack of coordinated security responsibility

IT271 - Audio Visual in classrooms

IT270 - Virtualisation of applications

IT266 - Centralised CCTV users administration software: POPI and security risk

IT265 - Lack of fire alarms in residences : Compliance to DHET regulations risk

IT264 - Alignment and serviceability of security systems : MC greatest risk, business continuity and disaster recovery risks

IT263 - PC C1 room 135 Council Chambers upgrading : Reputation and business continuity risks (Priority 10)

IT262 - MC Ccouncil Chambers audio and e-Conference upgrade (Priority 12) : Reputation risk and business efficiency

IT261 - PC (SANLAM auditorium) and MC (Great Hall) Sound systems need replacing: Reputation + business continuity risks

IT260 - Campus main gates : Maintenance and Reputational risk

IT258 - Protection Services Control Rooms : Security risk - Vulnerability to sabotage

#### ITanwu - REPORT 11

#### ITanwu - REPORT

# **GOVERNANCE**

IT governance (ITG) is defined as the processes that ensure the effective and efficient use of IT in enabling an organization to achieve its goals. IT @ NWU is primarily governed by three committees namely: IT Governance committee, IT committee and IT Advisory committee. Each has its own terms of reference but the main purpose is to oversee: IT alignment to business priorities, significant investment, management of risk, responsible asset management, policies and strategies and compliance to statutory requirements

The Information Technology Governance Committee	The Informa- tion Technology Committee	IT Advisory Committee	IT will consult on five decision are- as namely: • Principles • Architecture • Infrastructure
Is responsible for the gov- ernance of all aspects re- lated to information tech- nology at the NWU.	is responsible for assisting IT to manage demand.	The IT Advisory Commit- tee is a consultative body.	<ul> <li>Enterprise ap plication needs</li> <li>Investment and prioriti sation</li> </ul>

Aldine Oosthuyzen (Manager IT 10. Vaal Campus - NWU)

11. Adelle Lotter (Acting Director AOS -NWU)

12. Yvette Labuschagne (IT Project Management Office - NWU)

13. Jakkie Pretorius (Director of IT - UP) 14. Sakkie Janse van Rensburgh (Executive Director IT - UCT

## **OUR STRATEGY**

The IT strategy is to support the IT mission by balancing staff, operations and capital budget; to decrease the dependency on MS 1 funds for staff costs; to focus on adding value to the core business of the NWU through engagement and building partnerships while still striving towards improved service delivery.

Implement an agile staffing strategy that will improve the IT value proposition (aligned to the NWU success model) and have a balanced approach to the core activities of the University.

Position IT as a key enabler in the operationalisation of the University's Teaching and Learning Strategy.

Add real value to research ac-4 tivities by implementing an eResearch strategy with all the necessary stakeholders (Research DVC, Research Office, IT, Library, Research groupings).

#### **Stakeholder** Engagement

Engage with different stakeholder groups, building mutual trust and understanding to ultimately become strategic partners. Openness and transparency will be key in this strategy.

#### Cyber

Infrastructure

#### Support

# Continuous

5

Improvement

Improve the provisioning of ample and appropriate computing capacity, storage for large volumes of data, broad and ubiquitous connectivity, and specialised and IT-integrated capturing and analytical instruments.

Improve the IT support model to provide differentiated support and enable self-support while facilitating freedom of choice. Strive for operational excellence.

Continuously improve the current IT services to ensure higher availability and reliability, thereby increasing productivity and user satisfaction.

#### ITarwu - STRATEGY 16

According to Mr. Pretorius, Boeta Chief Director IT, the University of the Future will dif-

ferentiate itself from the others by the inventive use of Information and Communication Technology for all of its activities.

IT@NWU proud ourselves to follow a well-informed, structured, but agile process to formulate strategy and to plan the project, product and service portfolio.

In order to deliver the IT promise, we at IT@NWU:

Embrace the values of human dignity, equality, freedom, integrity, tolerance, respect, commitment to excellence, scholarly engagement, academic freedom and justice and we strive to deliver the IT promise

Information and Communication Technologies.

We maintain a three year rolling IT strategy with specific focus on staffing, research, learning and teaching, stakeholder engagement, cyber infrastructure, support model and continuous improvement. Along with input from other strategies, we determine year goals, which in turn directs our project portfolio and product service portfolio. In order to utmostly coordinate our strategy with business strategy, we take into consideration the following factors, as stipulated by means of the adjacent diagram:

#### Macro forces

On a global scale financial and environmental demands are driving us to achieve more with by empowering the NWU to excel- less, with specific focus on sus-

lence through the effective use of tainable use of scarce resources.

#### Industry forces

Modern day trends and practices in terms of IT focus on high-speed internet bandwidth and cloud services, with increased demands for big data, online collaboration, mobile apps and social media platforms.

#### Local realities

At our university we are guided by organisational realities such as the NWU strategy, vision, mission, values, the Success Model and structure.

#### Governance

Governance is critical to ensure the effective execution of IT matters and to sustain IT as a strategic enabler of the university's core business.

In order to govern IT responsibly, representation at key forums and platforms (such as Council committees, Senate and IM) is vital.

### ITДлии - PROJECTS 31

#### ITanwu - eRESEARCH 32

**IT ERESEARCH** CONSULTANT 2016 till current

Martin Drever

ABOUT THE ERSEARCH Initiative (eRIn)

In July 2015 the NWU officially commenced with an eResearch drive that will ultimately help to align research support units and researchers across all disciplines to embrace the power of the digital world in the 21st century. A NWU eReserach Initiative workgroup from IT, Library and Research and Research Support Office together with Anelda van der Walt has been established

The NWU eResearch initiative has not only impacted staff and students at the North-West University. In February 2016, the first inter-university eResearch meeting was conducted when UCT's eResearch team visited NWU to discuss eResearch matters, share lessons learned and plan collaborations.

http://www.nwu.ac.za/eresearch/news/nwu-supports-researchers-through-africa-research-cloud

## Shaping eResearch in South Africa

266

8

14

Under the leadership of Chief Director Boeta Pretorius, 2015-2017, the NWU has taken a lead in the eResearch landscape in South Africa, The focus was on creating awareness and platforms for discussion. The initiative duel favourable, as NWU eResearch collaboration with TENET resulted in funding to host Carpentry workshops and instructor training.

> Digital & Computational Workshops (The Carpentries) participants, 13 Carpentries including all three campuses

> > Articles published in the IT Magazine, 2 in the Eish! and a further 10 Blog posts, reflected the platforms utilised to disseminate information.

possible from one another.

Experts visited the NWU between 2015 and 2017, as part of the eResearch initiative, aiming to learn as much as

## credit for all your research

Data Repository Persistent DOI In-browser **Previews** 

# 2017

The NWU Library and Information Service in conjunction with IT services and the Research Office as part of eResearch initiative plan to run a 6-month pilot of the Figshare platform which will be starting at the beginning of April 2018.

Figshare - a data repository platform - is being piloted by several universities in South Africa to determine its fit within research workflows and suitability for housing all types of data generated during the research process. Datasets uploaded to Figshare is given a persistent DOI and can be made available to anyone or have restricted access. The platform supports in-browser previews of over a thousand file types and tracks access metrics of all items loaded onto it.

#### ITEINVU - FIGSHARE 35

#### Who was involved in the Figshare project?

At the NWU the Figshare pilot project was mainly pushed by the Library and Information Service, IT services and the Research Office.

#### Figshare awareness

Internationally institutions became more aware of the need to do proper Research Data Management (RDM). As a result of this trend various platforms were investigated by institutions in South Africa, and Figshare was identified as a strong candidate. Involvement on a national level by the Data Intensive Research Initiative of South Africa (DIRISA) also meant wide exposure to the Figshare platform through regional meetings held to introduce the community to Figshare.

#### Where did it all start?

The evolution of open access movement has changed the research and publishing environment. The main agenda of open access movement of publishing articles in open access platforms has been extended to include research data. Higgis<sup>1</sup> explains that academic research has two main outputs which both are equally important i.e. published paper and the data generated during research. Therefore, these research outputs need to be managed in an open access repository to facilitate sharing, re-use, reproducible, preservation, access and for citations. In support of open access agenda, most international publishers require datasets used to report research findings to supplement the research publication. In addition, funding agencies require researchers

"Fighshare possible platform for data deposits..."

#### Continues...

to submit data management plans with the funding proposal which describes how the research data will be managed throughout the research project. Furthermore, many government funding agencies have policies that mandate researchers to make government funded research freely available and accessible to the public. It is in this regard that in 2015, the National Research Foundation (NRF)<sup>2</sup> issued a statement which mandates researchers to deposit datasets supporting the research outputs into an accredited Open Access repository, with the provision of a Digital Object Identifier for future citation and referencing. In order to support NWU researchers to comply with these requirements, NWU IT and Library and Information Service have decided to pilot Figshare as a possible platform for the deposit of datasets.

#### "Fighshare's introduction..."

DIRISA held regional meetings during April 2017 to introduce Figshare to research institutions and academia in South Africa.

#### User facing platform needed

DIRISA is committed to long term preservation of data, and although there is storage infrastructure in place there is no user facing platform in place to facilitate the management of research data. Figshare will therefore be a service layer on top of national infrastructure to facilitate the capturing and management of data onto the storage infrastructure.

#### The RDM roadmap

In June 2016 the NWU eResearch Initiative conducted the first Research Data Management (RDM) workshop held in Potchefstroom. The attendees were researchers, librarians, IT staff and colleagues from the research office. The workshop aimed to provide an opportunity to develop a roadmap for RDM services at the university. One of the recommendations from the workshop was that a small RDM task team should be established to connect with various research environments to gather more information about their requirements, challenges, existing skills, and workflows. The RDM Task Team conducted interviews with researchers from various research entities.<sup>3</sup> From the exercise, it was found that there was limit-

#### ITICITIVU - FIGSHARE 37

#### Continues...

ed knowledge and understanding of RDM practises, some researchers had knowledge although they did not understand how it can benefit them. Those who knew about Research Data Management plans indicated that through collaborative research and internationally publishers they are aware of RDM as they are required by funding agencies and However, the most common research need was data storage and adequate technical support.

ITanwu - SURVEY

# IT Services Survey – October 2017 Introduction

An electronic survey regarding user perceptions of IT services was made available to all students and staff. Although the response rate was very low, the sample is still a good representation of the population. The Survey was completed by staff and students on all three campuses.

## **Overall summary of services** The following graphs depict a summary of the average rating of the services.

STAFF

83.3%

**STUDENTS** 

67.7%

#### ITI JIII - SURVEY 39

#### **Compliments or pos**itive comments in general...

"Thank you for your hard work and continued enthusiasm, despite having to work with all of us who less-than-optimally are trained in computer technology. "

"Working at home on VPN at the moment. (KFS, VSS) Excellent and so convenient!"

#### ITanwu - SURVEY

## **Overall summary of services**

The following graphs depict a summary of the average rating of the services.

### Compliments or positive comments in general...

"According to me the IT department is doing an excellent job."

"eFundi is an excellent program for learning."

"They do have a good attitudes toward students who doesn't now a thing about IT"

ternet.

I don't anything negative to say....amazing service. If you ask them something and they don't know they always come **STUDENT** back to you with the answer 8 STAFF ••• The Wi-Fi is not consistent. It continually connects and disconnects. Or it is very slow. WiFi is not available all over COMMENTS campus. Even some conference facilities does not have WiFi LAN Kabel werk die beste! Great In-IT - your'e awesome!

#### ITanwu - SURVEY 41

I have never experienced a problem with IT Staff, they are the best.

Always helpful and even go the extra mile.

Always long queues.

Sometimes the response time is slow if there are major events going on such as virus threats.

Thanks for giving us free Office 365!

I am pleased that we have access to some of the programmes from the NWU site for working at home e.g. Adobe Pro, Statistica, etc.

## A Initial Phishing Campaign Summary

Like many organisations, North-West University (NWU) is regularly targeted by random and focused phishing and/or malware attacks. The impact of these Cyber Attacks can be considerable with data leakage/loss, network outages, financial loss and reputational damage. NWU has asked KHIPU Networks Ltd to perform a baseline security assessment for evaluating the effectiveness of the current security awareness strategy as well as identifying the residual risk resulting from phishing and malware attacks. This section explains the findings and results from the phishing assessment service conducted between 22nd March, 2017 & 12th April, 2017.

## C Awareness Campaign Results

The awareness campaign results are used to determine how many of the users who were successfully 'phished' (when instructed via the awareness email) visited the education landing page and carried out the phishing guizzes and watched the awareness video.

page (216 students + 2 staff) ITIEITIMU - AWARENESS 43

Recipients who clicked on the link within the email (3.30% students & 3.60% staff)

Recipients who entered credentials on the phishing website (1.66% of students & 1.62% of staff)

Recipients who visited the phishing awareness education landing

Anna-Marie revealed that: "Some of the systems were already completed by the end of October 2016, and by the end of September 2016 we had compiled a complete end-toend testing plan."

## **BEHIND** THE SCENES LOOKING BACK...

#### ITEITWU - GLOSSARY 47

"We had to plan ahead, had to look at the 'what ifs' and simulate various scenarios. As we all have day jobs as well, we had to ensure that our work was not neglected due to the project. The team involved here is of outstanding quality," reveals Anna-Marie. She further stipulates that "they are very committed, pulled their weight, and are prepared to walk the extra mile. Additionally, we are very fortunate to have buy-in from top management and our back-office colleagues, who assisted with the day-to-day business."

We made a solemn decision that roll-back would not be an option. Therefore, we decided to push through. If unfore-seen incidents occurred, we've agreed to fix it in our stride."

"I was full of confidence that we were going to be successful, based on all the effort everyone had gone through. This was a mammoth task, as each of the 150 systems have their own sub-processes. One can compare it to a number of relay races that we were undertaking. We had to ensure that each process reached its destination successfully, and was accompanied by its correlating information.

#### free Training site

"Digital literacy aims to further the essential fundamental technology skills"

"We identified the need after the first board, and more information in this vear IT Induction event." claim me Letta Tefo, Junior Service Desk Consultant at Vaal Triangle Campus. According to Letta students participated in a test after the presentation. "Students who scored below 65% were encouraged to attend the Basic Computer Skills classes" she explains. "We start off with Basic Computer Skills: this includes the introductory basics for Word, Excel and Power Point. In addition we provide a Template in order to familiarise the students on how to write an Assignment." When it comes to MS Office, Digital Literacy helps a great deal to boost the students' skill set.

Testing

Students are given class exercises to measure their level of understanding with regards to the lectured content. How can students arrange for Training? Letta explains that:"We post the are available upon completion of these training schedule on the Notice courses.

Technology definitely plays an immense part to ease our task..." Mr. Bashir Ahmed

## **UNIT FOR OPEN** DISTANCE LEARNING

(uodl), regional centres were equipped with Wi-Fi & Internet...

The majority of these students consist of unqualified or under qualified practicing teachers, improving their qualifications through Open Distance Learning. Interactive whiteboards (IWB) are used at all Learning Support Centres (LSCs) to broad-

cast live sessions to students enrolled for distance education programmes at the NWU (UODL). All sessions are recorded (Panopto) enabling students that could not attend live sessions to download recorded sessions at a time convenient to them UODL support approximately 36000 open distance learning students, across all nine provinces of South Africa and in Namibia. The list below shows the UODL Centres which IT@NWU equipped with Wi-Fi so far.

These students write examinations at 107 examination centres across Southern Africa, from where paper examination scripts are transported to Potchefstroom, where they are marked by hand. The UODL Assignment and examination Department

UODL support approximately 36000 open distance learning students, across all nine provinces of South Africa and in Namibia. The list below shows the UODL Centres which IT@NWU equipped with Wi-Fi so far, refer to map.

(Pieter Vermaak, also visiting USQ)

receives approximately 375 000 paper

assignments and examination scripts

annually. The numbers of assignments

and examination scripts may increase

as other faculties at NWU are now join-

ing ODL offerings. For selected pro-

grammes eFundi are utilized whereby

assignments could be submitted and

resources accessed. Students may sub-

mit assignments at LSCs whereby cen-

tre managers courier these assignments

to the NWU.
