

Good day Pilot Lecturers

We're excited to share a new ACADEX feature designed to make module preparation clearer, faster, and more consistent.

Generating Summaries with LUMI Pro creates a polished, accurate "About the Unit" description directly from your existing course materials. It analyses selected pages, activities, and documents, and produces a concise, student-friendly overview aligned to your learning outcomes.

The attached Feature Spotlight gives you a quick, practical view of how it works and how it can support your teaching.

Regards,
